Bharat Connect for Business

Designed for How Businesses Really Work

At Tally, our goal has always been simple: to build software that adapts to the way you work, not the other way around. Software that quietly supports your day-to-day decisions, keeps you in control, and never slows you down.

With recent releases, we have strengthened the connected capabilities of TallyPrime, making compliance simpler, business banking smarter, and everyday operations more automated.

With TallyPrime 7.0, we take another meaningful step to make your business more secure, more connected, and more responsive than ever before.

What's New in TallyPrime 7.0

TallyDrive for Secure Cloud Backup

Secure, dependable auto backup that keeps your business running.

Auto Backup has always given businesses the confidence that their Tally company data is safe. In TallyPrime 7.0, it becomes even more seamless and flexible. Backups run quietly in the background when your system is on, even when TallyPrime is closed. You choose whether to store them locally or securely on TallyDrive. The reliability you trust now comes with greater ease and control.

Automated backups with complete control

Schedule daily, weekly, or monthly backups to a local drive or TallyDrive, even when TallyPrime is not running. Backups run in the background as long as your system is on, and you decide how many previous versions to retain for each company.

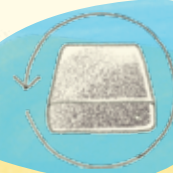

Secure cloud storage for your backups

Store your backups safely on TallyDrive, where each backup is encrypted and protected with your own password. Only authorised users can access or restore data, ensuring complete control and security.

Effortless sharing with professionals

Securely share backups with your tax practitioners, consultants, or chartered accountants whenever needed, making audits, filings, and reviews faster and more organised.

Flexible restore options

Retrieve the latest backup or any previous version whenever required. Restoring older data versions makes corrections, reviews, and audits simple and error-free.

Optimised storage and faster processing

Save storage space and reduce backup time with incremental backups that capture only the changes since the last backup. Intelligent compression keeps every backup file lightweight and efficient.

Instant alerts for backup failures

Get notified immediately in TallyPrime if a scheduled backup fails so issues can be addressed before they affect your operations.

Connected Payments with PrimeBanking

Banking that moves at the speed of business.

Managing payables should feel organised and stress free, and that's exactly what Connected Payments with PrimeBanking helps you do. Your banking and accounting stay in sync, so you always know what needs to be paid, what's already done, and what still needs your attention. No switching between portals, no repeating the same entries. Everything just moves smoothly within TallyPrime.

Send payments securely from within TallyPrime

Initiate vendor payments through bank APIs directly integrated with TallyPrime. There is no need to switch systems, create external files, or manually upload anything.

Get real-time payment updates

Track payment status and final reference numbers in real time as your bank processes each transaction, keeping your payables and cash flow visibility accurate at every step.

Share automated payment advice with vendors

Notify vendors automatically with email payment advice containing transaction and bill details. This reduces follow-ups and helps maintain clear, professional communication.

Auto-reconcile banking transactions effortlessly

Fetch bank statements in a click and reconcile payments and receipts instantly. Close books faster, and stay ready for audits with complete, linked transaction trails.

Supported for business customers of

Axis Bank, Kotak Mahindra Bank*, and State Bank of India

Support for additional banks is underway.

Instant Discovery with SmartFind

Work faster with instant, intelligent access to every user-entered detail in masters and transactions.

As your data grows, finding the right entry quickly becomes essential. SmartFind helps you locate user-entered information in masters and transactions from any screen in TallyPrime, even if you only recall part of the name or an approximate spelling. It is quick, intuitive, and designed to keep your work moving.

Search from anywhere within TallyPrime

Use SmartFind from any screen to look up masters and transactions without switching screens. No more digging into multiple reports or navigating further for anything that you may need instantly.

Find results from partial information

SmartFind retrieves all relevant records even when you enter only part of a name. For example, typing "Alex" will surface entries such as "Alexander", helping you quickly locate the user-entered details you need without remembering the full name.

Match beyond exact spelling

SmartFind understands partial inputs and similar spellings, helping you locate entries quickly.

Typing "Agrawal" also shows "Agarwal", ensuring you never miss the record you need.

Search across multiple loaded companies

View all relevant results together when managing more than one business entity.

Automate Invoice-to-Payment with Bharat Connect for Business

A connected way for businesses to exchange invoices, transact, and reconcile.

Built in partnership with NPCI Bharat BillPay (NBBL), Bharat Connect for Business keeps buyers and sellers digitally connected throughout the transaction cycle. Invoices move system to system, payments get confirmed instantly, and books stay aligned - all seamlessly inside TallyPrime.

➤ Exchange invoices system to system

Invoices go directly between systems, not over email, WhatsApp or PDFs. Both buyer and seller see everything in one organised place, with no retyping, forwarding or chasing.

➤ Automate purchase creation and item mapping

Create your purchase entry in a few clicks. TallyPrime reads the seller's invoice, understands the item descriptions, and maps everything automatically.

➤ Integrate payments with Connected Banking

When the buyer completes a payment, a confirmation with the UTR and bill-wise details is sent instantly. The seller gets clear visibility of what was paid and can update or automate receipts easily.

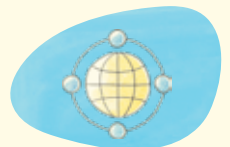

➤ Stay reconciled always

Sales to Purchase and Payment to Receipt entries update automatically, keeping Accounts Receivables, Accounts Payable and bank positions aligned for both businesses without manual follow-up or matching.

➤ Operate on an interoperable network

A national, interoperable network where you can exchange invoices and confirmations even when others use different ERPs.

Here's what our customers have to say about TallyPrime 7.0.

Sonu Singla

Managing Director
Bansal Fertilizer and Pesticides

“We are extremely impressed with the much-awaited Tally cloud backup, which is essential for safeguarding data against online threats. The SBI payment integration is truly a game-changer, and the ability to search across multiple companies has significantly reduced our effort and saved considerable time.

Vinod Dewangan

Accounts Manager
Mahadeva Vehicles Pvt. Ltd.
(Tata Motors)

“TallyPrime 7.0 makes daily accounting easier and more secure. Features such as auto backup ensure data safety without manual effort, while improved bank integration and GST compliance help reduce errors and save time. Overall, it provides better control and peace of mind for accountants.
